

How to keep your Bathroom Fittings lasting 10 years and more- Maintenance guide

Fittings in the bathroom are long term investments. They can be used over 10 years with due care without losing their lustre or functionality. Kamak Trichy is the leading dealer in sanitaryware in Trichy, and the maintenance guide is just a simple and efficient maintenance guide.

1. Clean Faucets Showers the Right Way.

The deposit of hard water and soap decreases the shine.

Do:

- Use mild soap + warm water
- Wipe with microfiber cloth
- Apply vinegar solution on mineral stains.

Avoid:

- Acidic cleaners
- Scrub pads
- Light washing keeps the finish years.

2. Guard Hard Water (Very Important in Trichy)

- White stains and low flow occur as a result of hard water.
- Clean aerators monthly
- Wet nozzles of soaps in warm vinegar.
- Install some kind of basic water softener.

3. Keep Closets and Cisterns in Order.

- Apply toilet cleaners that are ceramic-safe.
- Check clearing after each six months.
- Flush holes on the rim
- Fix leaks immediately
- Prevention also eliminates expensive repairs.

4. Wash Basins and Counters Clean and Spotless.

- Wipe after every use
- Use mild liquid cleaners
- Wipe pitfalls to prevent slow draining.
- Heavy items or harsh chemicals are to be avoided.
- This maintains basins to be shiny and free of damage.

5. Bathroom Accessories (Avoid Rust) Care.

- Choose SS 304 grade accessories
- Wipe regularly
- Keep bathroom ventilated
- Don't use sharp scrubbers

Nice accessories and basic maintenance = many years.

6. Check Fittings Twice a Year

Inspect:

- Tap joints
- Shower arms
- Basin nuts
- Cistern pipes
- Leaks and cracks are prevented by tightening loose points.

7. Improve Ventilation

- Use an exhaust fan
- Keep windows open
- Avoid constant moisture
- Bathrooms are dry thus securing all fittings against rust and fungus.
