# GUIDELINES TO MAINTAIN PARRYWARE PRODUCTS

#### To get the best results and the longevity of the product, follow the below mentioned guidelines:

- To get the best results and the longevity of the product, we suggest to use Parryware Safe essentials cleaning chemicals: Parryware Sanclean for sanitaryware, Parryware Floorclean for floor, Parryware Glow for taps & fittings.
- Keep your product (specially chrome plated) free from any deposits & clean it with water-soaked soft towel or bathing soap solution once in a day
  or two to keep the plated surface clean.
- Use only non-acidic cleaning/detergent agents which contain no acids or chemicals such as flush cleaner. Avoid the use of salt or vinegar-based cleaning agents to remove scale or scale-related stains. They may damage the surface or finish of your Parryware products.
- Always test your cleaning agents on an inconspicuous area on the product before applying it to the entire surface.
- Clean the aerators from time to time for a perfect foam flow of water from the fittings.

#### Protect your product from:

- Water Scaling: Due to presence of minerals and salt in water, scaling is formed on the product if it is not cleaned regularly. The products should be cleaned
  gently at regular intervals. Also take extra care to clean the edges and corners of the products because these areas are more vulnerable for scale settling.
- The property of water being used is very important for your plumbing installations (pipes etc.), as well as for your own hygiene.
- Acid Fumes: When we clean the tiles or floors in the bathroom with cleaning agents which contain acids or chemicals, acid fumes are formed.
   Because the basic material used in the products is brass, brass being an alloy of copper reacts with these acid fumes. with the reaction, a green-coloured layer is formed on the products resulting in damage to the outer finish or coating.
- Scratching While Cleaning: Scratching or scrubbing occurs due to hard nature of cloth or coarse cleaning powder being used for cleaning. Use a
  gentle fluffy soft cloth for cleaning the surface.
- Atmospheric Conditions: This condition applies mostly to salt content in the air in coastal areas, sometimes the air reacts with brass and black
  spots emerge on the surface of product. Therefore the product is required to be cleaned regularly. At the time of installation of the products, cover
  the products with the cloth covers provided in packaging or with polythene till the time you actually start using them.
- Care during Installation: The product come with the provision of fixation hole and it is always recommended to use the same to fix the product on
  the floor or on the wall usage of White/Black/Grey Cement, Concrete mixer, and POP is prohibited to fix the product. The gap formed between
  product and the floor or wall can be cover with Silent Gel which acts as water proof agent and will not allow to enter the water below or in the
  closet after fixing.
- At the time of installation of the products, cover the products with the cloth covers provided in packaging or with polythene till the time you actually start using them.
